Translation.

STAATSBAD OF THE KINGDOM OF THE NETHERLANDS.

(No. 374.) DECREE of November 26th, 1909, exempting from excise duty wine which is laid in stock in Distilleries of the First Class such as are referred to in Article 7, letter a of the Law of June 20th, 1862, for the purpose of being used therein for the manufacture of distilled beverages for exportation.

WE WILHELMINA, BY THE GRACE OF GOD, QUEEN OF THE NETHERLANDS, PRINCESS OF ORANGE-NASSAU, &c., &c., &c.

On the proposal of Our Minister of Finance of October 16th, 1909;

Having regard to the Law of June 12th, 1909, fixing further provisions respecting the excise duty on wines;

Having consulted the Council of State (Report of November 16th, 1909);

Giving attention to Our aforesaid Minister's further Report of November 23, 1909;

Have approved and agreed to stipulate as follows:

ARTICLE 1.

Exemption from excise duty shall be granted for wine which is laid in stock in distilleries of the First Class such as are referred to in Article 7, letter a, of the Law of June 20, 1862, for the purpose of being used therein for the manufacture of distilled beverages for exportation.

Exemption shall not be granted for wine, which according to trade usage is not to be regarded as drinkable wine, which is made from or mixed with juice or extracts of fruits other than grapes and raisins or contains less than *ten Litres* of alcohol per Hectolitre at a temperature of fifteen degrees of the centigrade thermometer.

ARTICLE 2.

The quantity of wine which may be stocked with exemption from excise duty in a distillery of the first class amounts to at least two Hectolitres.

ARTICLE 3.

The stocking of wine with exemption from excise duty may take place from abroad, from a bonded warehouse or from a storehouse enjoying extendible credit.

Our Minister of Finance may grant, subject to the necessary conditions, permission for stocking to take place from a manufactory of dutiable inland wine.

ARTICLE 4.

On importing wine from abroad or on removing wine from a bonded warehouse or from a storehouse enjoying extendible credit, a Customhouse document (volgbrief) shall be issued under security for the excise duty.

The quantity thus removed shall be written off the account with the bonded warehouse or with the storehouse.

In the Customhouse document (volgbrief) and in the statement to be made in order to obtain that document, mention shall be made of the destination of the wine which is stocked with exemption from excise duty.

The transport of the wine to the distillery shall take place under seal.

The collector who issues the Customhouse document shall mention therein the period within which the stocking must take place and the period within which the Customhouse document must have been received back at the Collector's Office, duly countersigned.

For wine for which Custom-house document shall not have been received back at the Collector's office within the appointed period, furnished with the above mentioned counter-signature, the excise duty shall be collected from the importer or from the supplier.

ARTICLE 5.

The officials shall compare the quantity which is being laid in stock with exemption from excise duty with the Custom-house document and they shall make experiments for the determination of the percentage of alcohol.

If the quantity of wine stocked proves to be smaller than that mentioned in the Custom House document, that document shall only be countersigned for the quantity ascertained.

After the determination of the percentage of alcohol, the officials shall mention that percentage on the Customhouse document, which shall thereupon be delivered by them to the Collector of the Commune where the stocking took place.

The said Collector shall debit the distiller for the quantity of spirit which the stocked quantity of wine contains on his account, as a distiller referred to in Article 82 of the Law of June 20, 1862.

The Collector shall, further, state this debiting in the Customhouse document and in the extract therefrom, and shall send the latter back to the office of issue.

ARTICLE 6.

It shall be prohibited to remove the wine laid in stock with exemption from excise duty, as such from the distillery or to use it for any other purpose than for the manufacture of distilled beverages for exportation.

ARTICLE 7.

If it transpires that the distiller stocks more wine with exemption from excise duty than is considered to be necessary for the business, Our Minister of Finance may limit the freedom to a quantity per annum to be specified by him.

ARTICLE 8.

This Decree shall enter into operation on the second day after the date of the "Staatsblad" and "Staatscourant" in which it is inserted.

Our Minister of Finance shall be charged with the execution of this Decree which shall be inserted in the "Staatsblad" and simultaneously in the "Staatscourant" and of which a copy shall be sent to the Council of State.

Houses of Parliament,
 Cape Town, 9th April, 1910.

This day, His Excellency the Administrator opened the Fifth Session of the Twelfth Parliament of the Cape of Good Hope, the Legislative Council and House of Assembly, being assembled in the House of Assembly as the Throne Room of the Houses of Parliament, and His Excellency was pleased to deliver the following speech :

MR. PRESIDENT AND GENTLEMEN OF THE LEGISLATIVE COUNCIL :

MR. SPEAKER AND GENTLEMEN OF THE HOUSE OF ASSEMBLY :

I have called you together in a special session and have asked you to make the necessary sacrifice of your time and convenience for an object in which I feel sure that you will heartily concur.

As you are aware the financial straits to which this Colony was reduced obliged my advisers to have recourse to a measure having for its object a general deduction from the salaries of those employed in the service of the Government.

This measure was continued for the current year at the last ordinary session accompanied by the expression of a hope that if the circumstances of the country improved a restitution of some portion of the sums deducted might be made.

I am happy to be able to inform you that the state of the finances has shown a most gratifying improvement coinciding with the prosperity of the agricultural community and there is every anticipation of a surplus at the close of the financial year.

Under these circumstances my advisers felt that it would be consonant with your wishes if the proper legal steps were taken to enable the Government to restore the whole, or a portion of the sum contributed to the needs of the country out of the salaries of a most deserving body of public servants who have borne their loss without complaining, and who have during the past two years of severe depression discharged enhanced duties with exemplary zeal and fidelity. To secure this end a measure will be submitted for your consideration which will, I hope, meet with your approval.

It only remains for me to congratulate you on the signs of improvement which are manifest in every direction and to express my hope that these will, under God's good providence, continue.

In a few weeks' time your political life, of which you are justly proud, will be merged in that of the larger South Africa. I have every confidence that this, the Mother State of South Africa, will carry into the Union those high aims and lofty ideals which have done so much for the civilization of this continent.

In His Majesty's name I now declare this Parliament to be duly opened.

PUBLIC NOTICE TO MAKE RETURNS.

IN pursuance of "The Income Tax Act, 1909," which imposes an Income Tax upon incomes exceeding £50, arisen or accrued during the year ended 30th June, 1909, and in respect of the occupation of houses during the said year which together with land occupied therewith were of the value of £75, notice is hereby given that the following persons residing in the Division or District of Barkly East are required to furnish at this Office within thirty days of the date hereof, returns for the purpose of the assessment of Income Tax of incomes arisen or accrued to them either personally or in any representative capacity during the year ended 30th June, 1909:—

- (1) Every Public Officer of a Company;
- (2) Every person whose taxable income during the year ended 30th June, 1909, exceeded £300;
- (3) Every other person liable to tax who has not already been assessed for Income Tax in respect of income arisen or accrued or occupation during the said year.

No female whose income during the said year did not exceed £300 is liable to tax, but the income of a woman married with or without community of property, and living with, or not legally separated from her husband, is deemed to be income accrued to her husband, and such income must be included in his return.

Any person who may not receive a form applicable to his particular case may obtain such form on application to me.

No person is exempted from the penalties in the next succeeding Sections mentioned by reason merely of the fact that

- (1) Such person may prove not to be liable to taxation, or
- (2) That such person may not have been called upon individually to render a Return.

Any person or company making a false return is liable under the said Acts to a penalty of £100, and to be assessed double the amount of Tax to which he otherwise would be charged; and any person whether liable or not liable to tax failing to furnish the prescribed Return within the prescribed time, or to furnish any further or fuller Return required from him, is liable for each offence to a penalty of a fine not exceeding £10, or, in default of payment, three months imprisonment with or without hard labour.

Subject to the exceptions hereinafter mentioned, and under exception specially granted in writing by the Inspector of Mines, the owner, agent or manager of a mine shall not employ any person in the mine, nor permit any person to be in the mine for the purpose of employment therein, unless the following conditions respecting shafts and outlets are complied with, that is to say:—

6. MINISTERIAL DIVISION OF SECRETARY FOR AGRICULTURE.

- (a) There must be two shafts or outlets with which every main level for the time being at work in the mine shall have direct communication, not less than four feet high and four feet wide, so that such shafts or outlets shall afford separate means of ingress and egress available to the persons employed in every such level, whether the shafts or outlets belong to the same mine or to more than one mine.

Exceptions to the foregoing Rule.

No. 1.—The provisions of the various clauses of this Rule shall not apply in the case of a new mine opened for the purpose of searching for or proving minerals, so long as not more than twenty (20) persons are employed in said new mine at any one time.

No. 2.—The provisions of the various clauses of this Rule shall not apply to any workings for the purpose of making communication between two or more shafts or outlets, or for opening out new levels, provided that not more than twenty (20) persons are employed at any one time, in any one shaft, or in any level having only one means of escape to the surface.

Rule 23.—Protection of Working Places.

- (a) At every staging, shoot, receiving box, tipping place or platform, shaftmouth, pass and other working place, which is dangerous or is likely to become dangerous to persons in or about the same, or in the neighbourhood thereof, there shall be erected and maintained a sufficient barrier or fence for the protection of persons and the safety of life and limb.
- (b) Persons in special charge of any such staging, shoot, receiving box, tipping place or platform, shaftmouth, pass and other working place as aforesaid, shall prevent any person or persons from working or attending any such staging, shoot, receiving box, tipping place or platform shaftmouth, pass or other working place, which is not properly protected as in the last preceding clause provided.

- (b) At every shaft station where it is necessary for workmen to pass from one side of the shaft to the other, provision shall be made for them to do so without entering or crossing a winding compartment, and such passage shall be securely fenced off from moving parts of machinery.
- (c) Entering or crossing a winding compartment of a shaft is prohibited, except to ascend or descend, and for purposes of repairs.

Rule 25.—Fencing of Entrances to Shafts.

- (a) The top and all entrances between the top and bottom of every working or pumping shaft shall be properly fenced, but this shall not be taken to forbid the temporary removal of the fence for the purpose of repairs or other operations if proper precautions are used.

- (b) Proper gates, guards, bars or other efficient movable barrier, to be approved by the Inspector, shall be provided and kept in good working order at every landing place in winding shafts whereat a fixed barrier or fence would be impracticable—as at the landing stage where trucks are run on to and off from the cages—and at every such landing place the shaft shall be securely fenced, so as to prevent the possibility of any person falling down the shaft.

Rule 26.—Shafts, Drives, and Excavations to be protected.

- (a) Every shaft, drive and excavation of any kind in connection with the working of the mine shall be securely protected and made safe for miners employed therein.
- (b) While men are employed sinking, deepening, repairing or otherwise working in any shaft, winze, pass or other similar position, a proper penthouse, or shield, shall when practicable be constructed and maintained overhead for the protection of such workmen from danger from falling stones, ground or other matter or material.
- (c) In sinking shafts the bucket or other means of conveyance must not be filled above the level of the brim. Before the bucket or other means of conveyance leaves the top or bottom of the shaft it shall be steadied by the workmen in charge.
- (d) In sinking any shaft or winze for prospecting or other purposes in the lowest level, the collar or top of such shaft or winze shall be raised at least two clear feet above the floor of such level, and shall be constructed so as to prevent any down-pour of water into such shaft or winze in the event of a sudden inflow of water into the said level or workings connected therewith, until such water shall have risen to a height of two feet above such shaft or winze, in order that workmen therein employed may have time to escape therefrom.
- (e) Every entrance to any place which is not in actual use or course of working and extension shall be properly fenced across the whole width of the entrance, so as to prevent persons inadvertently entering the same.

Rule 27.—Boring Rods to be used.

In every working in a mine approaching a place likely to contain a dangerous accumulation of water, boring rods shall be kept and used for the purpose of perforating the ground in advance and on each flank of such working; and no drive, gallery, or other excavation shall be made within a dangerous distance of such accumulation of water.

Rule 28.—Safety Chain for Tub, Carriage, Cage or Vertical Hoist.

In order to reduce the risk of accident through breaking of rings, shackles or shackle pins, or of other portions of the tugs or bridles in winding shafts, a chain or piece of sound hauling-wire shall be made fast to every cage or other vehicle in shafts, and be securely fixed to the hauling wire thereof, above or through the thimble eye of the said hauling wire, so as to be perfectly independent of and apart from the tug or bridle and connections thereof, and such chain or wire shall be sufficiently taut, of such ample strength, and so strongly attached that in the event of fracture of the tug or bridle or connections thereof, the tub, or carriage, or cage, or other vehicle (as the case may be) shall be retained in its proper and safe position.

In all cases where an efficient safety detaching hook is employed the safety chain or wire shall be passed through or securely attached to the lower shackle or eye of such safety Detaching hook so as not to interfere with the effectual action of such hook in the event of overwinding.

Rule 29.—Chains.

A single-linked chain shall not be used for lowering or raising miners or other persons in any working shaft or plane, except for the short coupling-chain attached to the cage or load.

Rule 30.—Length of Hauling Rope.

In the case of hauling ropes there must not be less than two rounds of rope upon the drum when the carriage in aerial gears, is at the tipping place in the mine.

or the cage, or other vehicle in the case of shafts, is at the bottom of the shaft.

Special care must be taken that the end of the rope is properly fastened round an arm of the drum.

Rule 31.—Slipping of Rope on Drum.

There shall be on the drum of every machine used for lowering or raising miners or other persons such flanges or horns, and also if the drum is conical, such other appliances as may be sufficient to prevent the rope from slipping.

Rule 32.—Brake Power for Hauling Gear.

- (a) In all hauling or winding engines the winding drum or drum shaft shall be fitted with suitable brake with foot lever, etc. (or other approved method of working it). This brake shall be quite independent of the brake that is generally affixed to the engine itself, in order to enable the engine driver to have effectual control of the hauled carriages, cages, trucks, or other vehicles, should anything go wrong with the crank shaft or geared wheels, etc.
- (b) In order that this brake may always be ready for action, the foot lever must not be supported by a wedge or chock of wood, or similar method, but when necessary the brake-strap must be kept off its bearing by this lever being supported by means of a suitable balance-weight.

Rule 33.—Guides and Signalling.

- (a) Every working shaft in which persons are raised or lowered shall be provided with guides, and every such shaft shall be provided with some proper means of communication by means of distinct and definite signals, from the bottom of the shaft, and from every entrance for the time being in use between the surface and the bottom of the shaft, to the surface, and from the surface to the bottom of the shaft, and to every entrance for the time being in use between the surface and the bottom of the shaft.
- (b) Every shaft in course of sinking and construction shall be provided with guides so soon as the depth of thirty yards from the top of such shaft shall have been reached, and means of signalling during the sinking and construction shall be provided in the manner specified in clause (a).

Rule 34.—Fencing Machinery.

- (a) Every fly-wheel and all exposed and dangerous parts of the machinery used in or about the mine shall be kept securely fenced.
- (b) The opening in the wall of the engine-house where the hauling wires pass through, must be so constructed or fenced that persons may not gain entrance to the house that way, in close proximity to the wires while the engine is running.

Rule 35.—Safe working condition of Hauling Gear.

Before commencing actual work with hauling or winding gears in the morning, and after every period of idleness of the gear exceeding 12 hours duration, and before any person is allowed to ride in any carriage, cage, or other vehicle of such gear, each empty cage or other vehicle must be run a complete trip up and down into the mine or shaft at least once, with a view of ensuring that everything is in safe and good working order.

Rule 36.—Protection of Signalling Wire.

Special care shall be taken by managers, contractors and others to prevent access to the signal wires and other signalling appliances by any person other than those in charge of them, and to guard against their being accidentally moved.

Rule 37.—Riding in Tubs or Cages.

- (a) No person shall be allowed to ride in cages, or skips or other vehicles, in shafts or inclined planes without the especial permission of the registered manager.
- (b) No person shall be allowed to ride in or upon loaded carriages or, in the case of working shafts, in any cage or other vehicle with a loaded truck therein, or in any cage, or other vehicle unprovided with a proper shield or covering overhead; and all cages

must be provided at each end with suitable bars or gates to prevent persons within from falling out.

- (c) In no case shall a greater number of men travel to or from the mine at any one time by means of tubs and carriages, cages, skips or other conveyances than can be conveniently accommodated with safety; and the manager shall fix the number allowed to travel at one time by means of every kind of conveyance in use under his control, and the same shall be kept posted at each landing; provided that in no case shall the load allowed exceed half the ordinary load which the machinery is capable of sustaining, except when allowed in special cases by the Inspector.

Rule 38.—Ventilation.

- (a) An adequate amount of ventilation shall be constantly produced in every underground system to such an extent that all the shafts, winzes, sumps, levels, underground stables, and other working places, and the travelling roads to and from all such working places, shall be in a fit state for working and passing therein.
- (b) Underground works, especially shafts, sumps, and winzes, which have been in disuse for some time, shall be examined with a light before being again used, in order to ascertain whether foul air or other dangerous gases have accumulated there, and no workman shall be allowed to proceed to such places until they are in a fit state to work or travel in.
- (c) All doors assisting or in any way affecting the ventilation shall be so adjusted that they are self-closing.

Rule 39.—Safety Lamps.

In every working approaching any place where there is likely to be an accumulation of explosive gas no lamp or light other than a locked safety lamp shall be allowed or used; and whenever safety lamps are required by these Rules and Regulations or by the Special Rules or By-Laws made in accordance with these Rules and Regulations to be used, a competent person who shall be appointed for the purpose, shall examine every safety lamp immediately before it is taken into the workings for use, and ascertain it to be in safe working order, and securely locked and in any part of a mine in which safety lamps are so required to be used they shall not be used until they have been so examined and found in good order and securely locked, and shall not without due authority be unlocked, and in the said part of a mine a person shall not, unless he is appointed for the purpose, have in his possession any key or contrivance for opening the lock of such safety lamp, or any lucifer match, or apparatus of any kind for striking a light.

Rule 40.—Lights and Fires.

- (a) No naked light, such as candles, paraffin lamps and torches, shall be used or allowed in any place where explosives are stored or manipulated.
- (b) No fires, for any purpose whatever, shall be used or allowed in any place underground, unless sanctioned in writing by the Inspector.

Rule 41.—Places of Refuge.

Every underground plane, on which persons travel, which is self-acting or worked by an engine, windlass or gin shall be provided (if exceeding 30 yards in length) with some proper means of signalling between the stopping places and the ends of the plane, and shall be provided in every case at intervals of not more than 20 yards with sufficient man-holes for places of refuge, or if there is not room for a person to stand between the side of a truck or wagon and the side of a plane, then (unless the trucks or wagons are moved by an endless chain or rope) at intervals of not more than ten yards.

Every road on which persons travel underground, when the truck or wagon is pushed or drawn by manual or other animal power, shall be provided at intervals of not more than 50 yards with sufficient manholes or with a place of refuge, which shall be of sufficient length, and of at least 3 feet in width, between the wagons running on the tram road and the side of such place.

Every man-hole and every place of refuge shall be constantly kept clear, and no person shall place anything in any such man-hole or place of refuge.

Where a trap-door has to be fixed in a main road, the person opening the door must be placed at the opposite side of that towards which the door opens, and use

a connecting rope. The door must be made to shut automatically, and a place of refuge provided for the person opening the door.

Rule 42.—Starting Machinery.

Previous to starting any new engine, steam boiler or hauling or lifting gear, and previous to resuming work with any machinery or gear after disuse thereof for a period exceeding four weeks, and before filling up any pit in which standing wires or guide wires are anchored on bank or below, the claimholder or miner must have an inspection made by a competent person, and a record of such inspection shall be entered in a book kept for that purpose, such book to be open at all times to the Inspector.

Rule 43.—Stopping for Repairs.

When engines or boilers are about to be stopped for repairs or for being thoroughly cleaned out, and when man-hole covers, etc., are about to be taken off for inward inspection of boilers, the owner, agent or manager must have an inspection made by a competent person, who shall make a true report of the result of such inspection, which shall be recorded in a book to be kept at the mine for the purpose, and shall be signed by the person who made the inspection; and such book shall be open to examination by the Inspector.

Rule 44.—Indicator for Hauling Gear.

Rule 45.—Boilers.

Test Cocks and Water Gauges.

- (a) Every boiler shall be fitted either with a glass water gauge and a proper set of test cocks of straightway construction, or with two glass water gauges each with independent connections to the interior of the boiler.

Steam Pressure Gauge.

- (b) Every boiler shall be fitted with an efficient steam pressure gauge having a distinct mark on the dial plate indicating the highest working pressure; otherwise, in lieu of being so marked on the dial plate, the maximum working pressure allowed shall be distinctly painted in bold figures not less than three inches in height either immediately above or below the fire-door of the boiler.

Water Level.

- (c) The lowest limit of the working water level of every boiler, or the relative height of the crown plate of the fire-box shall be conspicuously marked either by a brass plate and pointer placed immediately behind the tube of the glass water gauge or by a distinct white line painted across the plate on the stoking side of the boiler, with the words signifying its meaning.

Feed to Boilers.

- (d) Every boiler shall be provided with at least two independent feed apparatuses, preferably a donkey pump and an injector, either of which must in itself be able to supply the necessary quantity of feed water.

Safety Valves.

- (e) Every boiler shall be fitted with an efficient safety valve, which must have adequate steam way area to release so much steam as to prevent the pressure in the boiler exceeding the limit allowed, no matter with what intensity the fire is burning.

Safety valves must on no account be loaded or weighted beyond the pressure which the boiler is constructed to bear as its "working pressure."

Firing up of Boilers.

- (f) At the firing-up of boilers a responsible person, other than a native is to be present, to see to everything being in order.

Testing Boilers.

- (g) All boilers shall be thoroughly examined and tested as often as may be deemed necessary; and the owner, agent or manager shall be held responsible for all accidents arising from any imperfections therein.

Rule 46.—Explosives.

- (a) Magazines for storage in bulk of explosive agents shall be erected in such places and on such pattern as may be directed by the Secretary for Agriculture, and shall be subject to such regulations as may be in force or be hereafter promulgated by proper authority.
- (b) Expense magazines for storage of the daily requirements of explosive agents shall be situated in such position as may be suitable, and shall be formed by excavation in solid rock, earth or mine refuse, not liable to ignition or to spontaneous combustion or heating, and shall be so made and closed as to prevent unauthorized persons having access thereto, and to secure them from danger from without.
- (c) Expense magazines shall not be situated in any tunnel or underground place where any work is being carried on or in which any persons are employed.
- (d) The interior of each expense magazine and the benches, shelves, and fittings therein shall be of wood, and so constructed and so lined or covered as to prevent the exposure of any iron or steel, or the detaching of any grit, iron, steel, or similar substance, in such manner as to come into contact with the explosives; and such interior benches, shelves and fittings shall, so far as is reasonably practicable, be kept free from grit and otherwise clean.
- (e) Detonators, percussion caps and explosives of the fulminate class shall not be kept in the same store, magazine or other receptacle with blasting agents.
- (f) All tools and implements necessarily kept or placed in any expense magazine shall be made only of wood or copper.
- (g) Due precautions shall be taken to exclude water and to keep the interior dry and clean.
- (h) Persons under 18 (eighteen) years of age and natives shall not be permitted to enter any expense magazine in which is stored any explosive agent, nor to deposit therein or take therefrom any explosive, tool, implement or other article, except in the presence and under the supervision of some duly authorised adult white person.
- (i) The door of every expense magazine must be painted red, and the initials of the owner or user and number of the magazine must be painted thereon in white.
- (k) The quantities of blasting agents or explosives which may be stored in each expense magazine shall not exceed those required for one day's consumption.
- (l) Any expense magazine will be liable to be summarily closed against use as such on its appearing necessary or advisable to the Inspector that such should be done in the interests of safety of life and limb.
- (m) No person or persons shall smoke, use friction matches or any unguarded artificial light in or near any magazine and other receptacle wherein explosive agents are stored or placed, or when handling or manipulating explosives or preparing the same for blasting or other purposes.
- (n) In manipulating explosive materials or preparing charges for blasting purposes only a competent and reliable white man is to be employed but no person under eighteen years of age and no native is to be permitted to manipulate explosives or prepare the same for blasting or other purpose, or to charge shot holes or prepare shots.
- (o) Explosive agents shall be kept in properly constructed magazines as above provided which are to be kept securely locked, and to be approved by the Inspector of Mines, and no explosive agent of any description shall be kept otherwise than in such properly constructed and approved magazine.
- (p) In no case may detonators be transported in the same vehicle or carried in the same case or canister with dynamite or any other nitro-glycerine compounds.
- (q) Proper notice shall be given to the engine-driver, banksman, and onsetter immediately before explosives are conveyed in a shaft by means of machinery.
- (r) The engine-driver shall gently lower or raise the cage or other conveyance containing explosives, and the explosives may only be placed in or taken out of the shaft conveyance by the person duly authorised thereto by the manager or mine overseer.

6. MINISTERIAL DIVISION OF SECRETARY FOR AGRICULTURE.

Rule 47.—Blasting.

- (a) Blasting shall in every case be carried on under the direct supervision of a European experienced in blasting, and on no account whatever is a native to charge holes or prepare any kind of blasting shot, or in any way manipulate explosives, but he may, under the immediate supervision of a workman authorised to do so, assist him in lighting the fuses.
- (b) When a charge has missed fire, no person shall return to the place until after an interval of not less than 10 minutes, unless the shot was attempted to be fired by some electrical appliance.
- (c) Wooden tamping rods are the only kind to be used for driving the cartridges into the holes, and no tools or implements required for charging holes with any blasting agent, or for manipulating or preparing any explosives shall be used which are made wholly or in part of iron or steel; and no explosives shall be forcibly pressed into a hole of insufficient size.
- (d) Before firing a shot in any place which is likely to be holed by such blast into another place, the person about to fire the shot shall first examine the place into which he is likely to hole, and satisfy himself that no person is in at the time; and every person about to fire such a shot shall take precautions to prevent any person going past the end of such place until after the shot is exploded.
- (e) No description of fuse which burns irregularly, or which explodes while burning, shall be used or be allowed to be used.
- (f) No fuse or explosives are allowed to be in or taken into the mine other than the brands specially authorised by the Mine Manager.
- (g) Every person using explosives in any shaft, winze, tunnel or underground working place shall use two hand boxes, made to close, and keep his dynamite or other explosive substance alone in the one box, and the detonators in the other, and under no circumstances shall explosives be conveyed by such person in any other manner, or in any box that is broken or unsafe. The boxes must be kept clean, and free from any grit or material likely to cause sparks.
- (h) No person carrying explosives shall be allowed to smoke or have in his possession any friction matches, nor shall he himself carry a light; underground, he shall be preceded by a person carrying a light, whose duty it shall be to give proper warning of the approach of explosives.
- (i) A charge of powder or other explosive which has missed fire shall not be unrammed.
- (k) Every blaster in underground workings shall see that all persons have been removed from the dangerous locality of the shot about to be fired and that a sufficient guard is placed on every avenue and passage of approach to the locality, so as to prevent any person, not having received his caution, from placing himself in the dangerous locality of the shot, and that before firing due warning is given in every direction by shouting "Fire."
- (l) No contractor or other person requiring explosive agents underground shall take, or be allowed to take, into the mine at any time a greater quantity of explosive agents than he requires for his own use during the ensuing 24 hours.
- (m) Before commencing work, either at the beginning of a shift or after blasting, the miner in charge shall be the first to enter the working place, and, until he considers it safe, he shall not allow any workmen to proceed thereto except those required by him to make the place safe.
- (n) Every blaster shall observe the reports of the shots he has fired, and shall by this means and by due diligence in examining the locality of every shot that has been fired ascertain if any shot has missed fire. He shall particularly examine the bottom of any hole which may be left from the firing to discover if from any cause there remains any unexploded matter, and in case unexploded matter be found it shall be treated exactly in the same manner as a shot that had missed fire, and all precautions taken as with a missed hole.
- (o) Whenever an unexploded hole, or a hole containing dynamite or any nitro-compound is found, the same shall, if possible, be exploded at once. Drill-

holes bored near to holes in which the charge has missed fire shall be given such a direction that they cannot come in contact with them. The miner in charge shall point out to each native driller working under him the exact position and direction of the bore-hole to be drilled, and see that he does not deviate therefrom. Before beginning to drill a hole all loose and loosened rock and ground must first be removed from the face and immediate vicinity of the working place. The deepening of holes or any part of holes left standing is strictly prohibited unless it is positively known that they have not been previously charged with explosives. Explosives shall not be extracted from a hole which has once been charged; the tamping may only be withdrawn sufficiently to allow a missed shot being fired.

- (p) Whenever a tunnel, winze or "rise" is started to connect with other works in the mine, detailed information should be given to all persons in charge of such works, such information to be furnished either by the Surveyor or Overman as in the opinion of the Mine Manager the nature of the work may require. It shall be the duty of every miner undertaking work of this nature to acquaint himself fully as to the position of his work in relation to other works which may be affected by his blasting operations. No work shall be turned over from one miner to another without full explanations of the nature mentioned above. Whenever any doubt exists as to the position of the work, the miner in charge must report to the Overman, and receive either from him or the Surveyor the necessary information.

Rule 48.—Withdrawal of Workmen in case of Danger.

If at any time it is found by the person for the time being in charge of the mine or any part thereof that from any cause whatever the mine or the said part is dangerous, every workman shall be withdrawn from the mine or such part thereof as is so found dangerous, and the manager or other competent person who shall be appointed for the purpose shall inspect the mine or such part thereof as is so found dangerous, and if the danger arises from inflammable gas, shall inspect the same with a locked safety lamp, and in every case shall make a true report of the condition of such mine or part thereof to the Inspector; and a workman shall not, except in so far as is necessary for enquiring into the cause of danger, or for the removal thereof, or for exploration, be re-admitted into the mine or such part thereof as was so found dangerous until the same is stated by such report, or by the Inspector, not to be dangerous. Every such report shall be recorded in a book which shall be kept at the mine for the purpose, and shall be signed by the person making the same.

Upon destruction or disablement of any of the escape shafts or outlets, where there are not more than two such shafts or outlets as required in Rule 22, so as to render rapid and easy escape of the workmen by such damaged shaft or outlet impracticable, all persons shall be immediately withdrawn from the underground workings in the mine and the circumstances shall at once be reported to the Inspector; and no person shall re-enter or be allowed to re-enter the mine excepting as provided for in Rule 22, until the two means of escape have been restored.

Rule 49.—Ambulances and Stretchers.

Properly constructed ambulances and stretchers, to be approved by a qualified surgeon, and to be furnished with splints and bandages, shall be kept ready for immediate use at every mine where they shall be under the constant charge of a reliable person recommended by a qualified surgeon as competent to apply splints and bandages in urgent cases.

Rule 50.—Fencing of Abandoned Mines.

When any underground working to which these Rules and Regulations apply shall be abandoned, or the working thereof discontinued, the owner thereof, previous to such abandonment or discontinuance, shall cause the top of the shaft or shafts and any side entrance or entrances from the surface to be and to be kept securely fenced for the prevention of accidents, or shall cause such shaft or shafts to be filled in to the surface level with ground, rock or debris.

6. MINISTERIAL DIVISION OF SECRETARY FOR AGRICULTURE.

Rule 51.—Notice of Opening and Abandonment of Mine.

Where any working is commenced for the purpose of opening a new shaft for, or a seam of, any mine, or where a shaft or seam of any mine is abandoned or the working thereof discontinued, or where the working of a shaft or seam of any mine is recommenced after any abandonment or discontinuance for a period exceeding two months, the owner, agent, or manager of the mine shall give notice thereof to the Inspector within fourteen days after the commencement, abandonment, discontinuance, or recommencement.

Rule 52.—Inspection.

An Inspector under these rules and regulations shall have power to do all or any of the following things, namely:—

- (a) To make or cause to be made such enquiry and examination as he may consider necessary to ascertain whether the provisions of these Rules and Regulations or his notices are duly complied with.
- (b) To enter, inspect, and examine any mine and every part thereof, and any machinery used in connection with such mine, and any mining area, at all reasonable times by day and night, but so as not to impede or obstruct the working of the mine.
- (c) To examine into and make enquiry respecting the state and condition of any mine, or any part thereof, and the ventilation of the mine, and the sufficiency of the special rules for the time being in force in the mine, and all matters and things connected with or relating to the safety of the persons employed in or about the mine, or any mine contiguous thereto, or in any mining area, or the care and treatment of the horses and other animals employed in the mine or mining area.
- (d) To exercise such other powers as may be necessary for carrying these Rules and Regulations into effect.

Every person who wilfully obstructs the Inspector in the execution of his duty under these Rules and Regulations, and every owner, agent, and manager of a mine who refuses or neglects to furnish to the Inspector the means and assistance necessary for making any entry, inspection, examination, or enquiry under these Rules and Regulations in relation to the mine or mining area, shall be guilty of an offence against these Rules and Regulations.

If in any respect (which is not provided against by any express provision of these Rules and Regulations, or by any special rule) the Inspector finds any mine, or any part thereof, or any matter, thing, or practice in or connected with any such mine or mining area, or with the control, management, or direction thereof by the manager, to be dangerous or defective, so as in his opinion to threaten or tend to the bodily injury of any person, he may give notice in writing thereof to the owner, agent, or manager of the mine, and shall state in the notice the particulars in which he considers the mine or any part thereof, or any matter, thing, or practice to be dangerous or defective, and require the same to be remedied forthwith, but such notice shall not absolve such owner, agent, or manager from liability to a prosecution for contravening any of these Rules and Regulations.

No person shall be precluded by any agreement from doing, or be liable under any contract to any penalty or forfeiture for doing such acts as may be necessary in order to comply with the provisions of this Rule.

The powers of the Inspector of Mines shall extend over the whole of the mines to which he may be appointed in so far only as the general safety of life and limb is concerned.

Rule 53.—Defining Boundaries of Claims.

In no case shall it be incumbent on the Inspector to point out the boundaries of any claim or block of claims, or to state in any order issued by him the number of any claim referred to in such order; and it shall, in all cases in which notice or warning of danger shall be given to any person by him, be sufficient that he, the Inspector, shall have pointed out the danger or dangerous ground or position in question to the manager, or to the miner in charge.

Rule 54.—Names of Persons.

Any miner shall, on being required to do so by the Inspector state to him his name, and (when in service) that of his employer, and on his refusal to do so, such

miner shall be guilty of an offence against these Rules and Regulations.

Rule 55.—Calling Evidence.

The Inspector may, for the purpose of investigating any matter connected with the working of any mine or mining area under his control, summon all witnesses in such cases to appear before him and examine them on oath; and in default of their appearing may issue warrants for their being brought before him: provided always that such investigation shall be restricted to matters affecting the safety of life and limb only; and any owner, agent, manager or miner disobeying such summons or warrant shall be guilty of an offence against these Rules and Regulations.

Rule 56.—Accident through Neglect of Notice.

In case any owner, agent, manager or miner disregards any notice served upon him by the Inspector having reference to the protection of life and limb, and an accident causing damage to life or limb occurs, which, but for such disregard, would have been avoided, such owner, agent, manager or miner shall, besides the liability attaching to him under any other law, ordinance or act, be liable to the penalty provided for a contravention of these Rules and Regulations.

Rule 57.—Appeal.

When any owner, agent, manager or miner shall feel himself aggrieved by any notice of the Inspector served upon him, he may refer the matter in dispute to arbitration as hereinafter provided; but any notice or order duly served or published as herein required shall be complied with within twenty-four hours of receipt of same.

Rule 58.—Knowledge of Rules.

Every owner, agent, manager, miner, and other person concerned shall make himself acquainted with these Rules and Regulations; and ignorance of the terms or provisions of such Rules and Regulations, or any of them, on the part of any owner, agent, manager, miner or other person concerned shall not in any way acquit him of responsibility or liability in respect of these Rules and Regulations, or any of them.

Rule 59.—Contravention and Penalties.

Any owner, agent, manager or miner or other person concerned who shall contravene or fail or neglect to comply with the provisions of these Rules and Regulations, or any of them, or with the provisions of any notice or order issued under terms of any of them, shall be guilty of an offence against these Rules and Regulations, and shall upon conviction thereof before a competent Court be liable to the penalty provided by Section 4 of Act No. 18 of 1894.

Section 4 of Act No. 18 of 1894, above referred to, is as follows:—

“Every such rule shall, upon being so proclaimed, have the force of law at and for the mine, digging, or area referred to in the proclamation in the last section mentioned, and every person who shall contravene any rule so proclaimed as aforesaid shall be liable to a fine not exceeding £100, or in default of payment thereof, to imprisonment with or without hard labour for any period not exceeding three months.”

Rule 60.—Court of Summary Jurisdiction.

All fines and penalties imposed under the provisions of these Rules and Regulations shall be recoverable in the Court of the Resident Magistrate for the district in which the digging or mine is situated.

Rule 61.—Arbitration.

- (a) When any matter or subject in dispute has been referred to arbitration, as hereinbefore provided, the respective parties to the said dispute shall appoint an arbitrator, who shall decide between them; and in case the said parties should fail or refuse to agree upon such arbitrator, then each party shall, within seven days after lodging of the protest or objection, appoint an arbitrator and notify such appointment to the opposite party, and such arbitrators before proceeding to the arbitration shall appoint an umpire to decide on points on which they may differ.

6. MINISTERIAL DIVISION OF SECRETARY FOR AGRICULTURE.

- (h) The decision of such arbitrator, arbitrators, or umpire, as the case may be, shall be final.
- (c) The arbitrator, arbitrators or umpire, as the case may be, shall give his or their decision within seven days (not counting Sundays) from the date on which the last of them was appointed, but shall upon sufficient cause to them appearing, have the power of extending that time to any period not exceeding ten days in all (not counting Sundays), and if within that time he or they fail to give his or their award, his or their office shall cease and determine, and the original order become final.
- (d) In the event of either party failing to appoint an arbitrator within the time specified in clause (a) preceding of this Rule, or in the event of either arbitrator, in cases where two arbitrators have been appointed, failing or refusing to act, the arbitrator appointed by the one party, or the remaining arbitrator, as the case may be, may proceed to hear and determine the matter in dispute or under objection, and his award shall be final.
- (e) Should the arbitrators fail, neglect or refuse within three days of their appointment to appoint an umpire as hereinbefore provided, the Secretary for Agriculture shall have power to appoint an umpire upon request made by either party to the dispute, and the arbitration shall be taken as commencing from the date of receipt of such appointment by the person consenting to act as umpire.
- (f) The costs of the arbitration shall be paid as may be directed by the arbitrator, arbitrators or umpire, as the case may be.
- (g) The arbitrator, arbitrators or umpire may examine the parties and their witnesses on oath, and may consult such persons as he or they may deem advisable or necessary, and may order to be paid, as shall be directed in his or their award, such money remuneration as he or they may deem suitable to any witnesses or persons consulted in his or their investigation.

SPECIAL RULES.

Each Lot will be put up at the upset price fixed, and the highest bidder who shall have offered not less than such upset price shall be declared the purchaser, and every such purchaser shall have the option of paying either the whole or a part of the purchase money on the day of sale: Provided

- (i) That if no payment be made on the day of sale, one-tenth of the purchase price shall be paid at six and one-tenth at twelve months from the day of sale.
- (ii) That if less than one-tenth of the purchase price be paid on the day of sale, the balance of such one-tenth shall be paid at the expiration of six months and the remaining one-tenth at the expiration of twelve months from the day of sale.
- (iii) That if the amount paid on the day of sale be one-tenth or any sum between one-tenth and one-fifth of the purchase price, the balance of one-fifth of the purchase price shall be paid at the expiration of twelve months from the day of sale.

“17. In geval van eenig verzuim gedurende den duur van de licentie om te voldoen aan de condities van occupatie, kan de Minister de licentie verklaren als geheel en al verbeurd, en het land in verband voor welk de licentie uitgereikt is zal naar het Gouvernement terug vallen: Mits dat indien het bewezen is geworden naar de voldoening van den Minister, dat het verzuim om te bewonen werd veroorzaakt door droogte, mag hij zulk verzuim verontschuldigen maar zulke verontschuldiging zal niet gegeven worden voor een tijdperk van meer dan twaalf maanden, tenzij zulke droogte aanhoudt voor een langer tijdperk.

“18. Op het einde van de vijf jaren voor welke eenig licentie gegeven is, en indien de Minister tevreden is dat aan de condities daarin vervat behoorlijk is voldaan, zal hij laten uitreiken aan den licentiehouder een schenking op het land gehouden en bewoond door hem op erfpacht tenure, onderworpen aan de condities vermeld in Sectie V van Wet 15 van 1887, onderworpen aan betaling van vijftien jaarlijksche paaiementen, elk van het bedrag van een twintigste van de waarde van het land, tezamen met de waarde van de landmeting en andere onkosten die een eerste last zullen wezen op zulk land, en verzekerd worden door een verband ten gunste van het Gouvernement: Tenzij dat in geval het bewezen is geworden tot bevrediging van den Minister, die certificaten zal noodig hebben te dien effekte, dat de licentie houder na twee jaren van occupatie permanente verbeteringen gemaakt heeft op het land bewoond door hem onder zoodanige licentie ten minste van gelijke waarde van genoemd land, de Minister dan aan hem mag uitreiken een grondbrief op het land gehouden of bewoond door hem, onderworpen aan de betaling van zoo vele jaarlijksche paaiementen van een twintigste van de waarde van het land, tezamen met de waarde van de opmeting en andere onkosten, die zullen, tezamen met jaarlijksche paaiementen betaald door hem, in verband met de licentie van genoemde grond, de geheele waarde opmaken, en zulk jaarlijksche verschuldigde paaiementen zullen vast gezet worden door verband.

“19. Indien eenig paaiement niet betaald zal wezen binnen drie maanden van den datum op welk het schuldig en betaalbaar is, zal een additioneele som gelijkstaande aan een vierde deel daarvan bijgeteld worden als een boete, en zal, tezamen met het onbetaalde paaiement, inbaar wezen door gerechtede vervolging van het Gouvernement in eenig bevoegd Gerechtshof.

ALGEMEENE VOORWAARDEN.

1. Alle applicaties moeten worden ingezonden vóór Woensdag, 15 Juni 1910. Applicaties kunnen echter worden ingezonden na den genoemden datum voor zoodanige erven als niet zullen zijn gealloteerd, en deze applicaties zullen naderhand door den Raad worden overwogen.

2. Voor het doel van deze kennisgeving kan één lot zoodanig aantal erven bevatten die een totaal area van ten naastenbij 10 morgen besproeibaar land maken, en de onderverdeeling van erven in passende percelen zal geschieden door den Minister die op aanbeveling van den Land Raad, beslissen zal hoeveel land aan iederen applicant zal worden gealloteerd.

3. Applikanten die de uitroeping van erven te hunnen behoefte wenschen over te laten aan den Raad, kunnen in hunne aanvragen uitlaten het bijzondere erf of erven te noemen waarvoor zij aanvraag doen, maar zij kunnen

in plaats daarvan eenvoudig het aantal erven of het totaal aantal morgen opnemen die zij wenschen te verkrijgen.

The demand during the preceding month was 138.

The unfilled vacancies were as follows:—Bootmakers (lasters and finishers) bristle dresser, carriage trimmer, electrical fitters, linotype operator (English and Dutch), lithographer, moulder, toolsmiths and woodworking machinist.

The considerable increase in the demand was due to requisitions received for Cape coloured labourers for the Rand Mines and Railway Construction in German South-West Africa, but only a very small number of applications were received from men desirous of proceeding. There was also a demand for 300 Kafirs and natives for the latter centre, but in this case the action of the Bureau was limited to making the offer of employment as widely known as possible, notices being posted at all the Locations and Magistrate's Courts in the District. As a result of the recruiting, nearly 400 natives were despatched to Luderitzbucht at the end of the month.

A circular has been issued by the Natal Government Railways notifying vacancies for a number of qualified engine-drivers, firemen and guards.

The Secretary of the School Board for the Cape Division intimates that in order to extend the facilities for Technical Education and to enable persons who are engaged during the day to improve their knowledge on subjects relating to their profession: Technical Evening Classes will be commenced at the South African College on April 11th, 1910. The fee per session of 21 weeks will be 10s. for a single class of one hour's duration, or 20s. for a class of two hours. The subjects of instruction are as follows, and others may be added according to circumstances:—Agricultural chemistry, botany and zoology, building construction, blacksmithing, carpentry and joinery, drawing, electrical engineering, elementary chemistry, workshop mathematics, mechanics, mechanical engineering, pattern making and foundry work, physics, plumbing, steam engine and driving, telegraphy and telephony, wireman's work, workshop practice.

The following is a statement showing the current standard rates of pay and working hours in the printing trade recognised by the Typographical Society:—

INDUSTRIES.

Sheet metal-working.—Very busy. Many men are working overtime, and two vacancies for experienced hands are reported. *Brushmaking*.—Busy. First-class hands are in constant demand. *Coach and wagon-building*.—Much brighter since January. One bodymaker is required. *Plumbing*.—Dull to fair. *Tanning*.—Very busy; all hands are fully employed. Hides, although a trifle "easier," are still very highly priced and difficult to obtain on account of the heavy buying for overseas. *Saddlery and harness-making*.—Very busy; there is no lack of employment for good workmen and several vacancies are still unfilled. *Boot and shoe-making*.—Exceedingly busy. There is a brisk demand for leading hands, at present unobtainable in the Colony. *Engineering*.—Dull to fair. There was little activity during the month, but all the regular hands were fully employed. A certain amount of repairs to shipping, and the making of windmills and irrigation machinery continued to afford employment to a number, and the outlook is considered to be very fair. *Printing*.—Lithographers were exceedingly busy, and compositor and machinists fully employed. Linotype operators, especially those accustomed to Dutch Manuscript, were in brisk demand. *Binding*.—Moderately active. *Paint-making*.—Progressing slowly. An order from the Government of Natal is in course of execution at a local factory. *Jam-making*.—Very fair, with the prospect of a slight falling off in activity in the near future. *Confectionery*.—Moderately busy. *Stone-dressing*.—Busy, with the prospect of a demand for men at an early date. Among the buildings in course of erection, or about to be put in hand, are the following:—Parliament House (granite, freestone and marble). African Homes Trust (granite). New Salesian Institute (base of hard stone), and the new Supreme Courts. The latter, if constructed of granite, will, it is estimated, provide employment for 50 dressers for nearly two years. *Milling*.—Normal. Employers have no difficulty in obtaining all the labour required. *Baking*.—Normal. There was apparently no decrease in the number of persons engaged in this industry. *Biscuit-making*.—Dull. *Sail and tent-making*.—The improvement noted for February was continued during the period under report. Vacancies exist for two first-class hands. *Furniture and cabinet-making*.—A further improvement is reported in this industry, and qualified upholsterers, cabinet makers and polishers have no difficulty in obtaining employment. *Joinery*.—Increased activity is reported in all sections of this trade; the demand from the Northern Colonies for builder's joinery showing in particular a marked improvement. Particulars of vacancies for woodworking, machinists and turners may be obtained on application at the Bureau. *Cardboard box-making*.—Fairly busy. Several machines of a new type have recently been installed, and vacancies exist for a first-class male hand and a few girls. *Tobacco and cigarette manufacture*.—A steady improvement is reported. *Lead pipe and solder-making*.—

2. COLONIAL SECRETARY'S MINISTERIAL DIVISION.

Fairly busy. A number of orders have recently been received at the local factory from Municipalities in Natal, the Orange River Colony and the Coast. *Tailoring*.—A steady general improvement is reported in the "bespoke" trade, and there is every prospect that this improvement will be continued. First-class tailors, especially dress and frock-coat hands, are in demand, but there is no lack of second grade and inferior labour. Workers in the "post order" and "ready to wear" branches are busily employed, and a number of vacancies were filled. *Shop-fitting*.—This industry, which had shown some improvement recently, was in a dull condition during the period under report, and a total of about 18 artisans were temporarily disengaged. There are, however, many indications of an improvement in the near future.

OTHER WORKS IN PROGRESS.

The following are particulars of Municipal and other works in progress, the number of men employed being stated in parenthesis:—

CAPE TOWN.—*Loan and Adopted Streets* (E. 10, C. 30). *Foreshore Reclamation* (E. 9, C. 14). *Strand Street Quarry* (E. 4, C. 35). RONDEBOSCH.—*Road Repairs* (Departmental) C. 18.

EENDEKUIL RAILWAY WORKS.

14 men were despatched to this centre during the month.

Representations having been made to the Government as to the conditions of employment at Eende Kuil, and in view of statements published in the public press as to the conditions of employment at these works: the following extracts from a report kindly supplied by the Engineer-in-Charge, at the request of the Colonial Secretary, is published for general information:—(1) The average European labourer, in the true sense of the word, is superior to the native or coloured labourer, but the European who comes to Relief Works is not as a rule of the best type of European labourer. (2) The work could be carried out by sub-contractors at the present rates. Coloured labourers would then be engaged and paid by the day, and the wages would be according to each man's capacity. (3) There is no foundation in fact for the statement that the men are dependent upon the monopoly of a local storekeeper, there being three stores near the places where the men are employed. (4) If the men agree to mess together they should be able to feed themselves for 1s. 6d. per diem. (5) The conditions of employment are for the men preferable to those obtaining for ordinary labour and give a hardworking man an opportunity of doing much better for himself than if paid a wage, but the prices paid cannot be gauged according to the requirements of the individual with the largest family to support. Some of the men are not accustomed to the pick and shovel, and will not realise that they must become "hardened" before they are able to earn the highest rates. An able-bodied man may reasonably expect to earn from 5s. to 6s. per diem, amounts actually being received at present by those who have remained at the work.

RELIEF WORKS.

The following are the statistics in regard to Relief Works:—

The relief workers were employed in gardening, the care of young trees, trimming hedges and thinning firs, woodcutting, the removal of Government stores and on the road-making extension from the Cape Police Depot to the Cemeteries road.

64 women and children, or 4.26 per family, were dependent or partly dependent upon the 15 married men and were rationed from Oude Molen.

One female and 122 male indigents (E. 53; C. 69), formerly inmates of the Old Somerset Hospital, were also accommodated at the Camp. Three indigents and one relief worker were under treatment at the Camp Hospital, of whom 1 died, 1 was re-transferred to the Old Somerset Hospital, and 2 were discharged.

SALVATION ARMY.

2,176 men, or 70.19 per night, were accommodated with beds at the Workmen's Metropole as compared with 1,676 in February.

RELIEF OF DISTRESS: WOMEN AND CHILDREN.

In addition to the food supplied to the wives and families of men employed at the Relief Camp, 4,789 rations were issued by the Labour Bureau in Cape Town to 41 destitute families (E. 14; C. 27), including 152 children, as follows:—

4, 292 rations were issued during the preceding month.

THE CAPE PENINSULA CHARITY ORGANISATION.

The Secretary of the above Organisation reports that 27 fresh applications were received during the month of March, 1910.

The applications represented 43 adults (32 European and 11 coloured), and 54 children. 17 applications were received from married couples, 6 from single men, and 3 from widowers. After due enquiry the deserving cases were referred to the various societies and institutions providing employment and administering relief, or temporarily relieved according to their needs.

OTHER DISTRICTS.

Beaufort West.—The retail trade is very dull and the building trade at a standstill. *Bredasdorp*.—The building trade is quiet, and labourers are plentiful. *Calvinia*.—Coloured shepherds are required. *Carnarvon*.—There is a demand for shepherds and native farm hands. *Ceres*.—The New Town Hall is in course of erection, and tenders have been invited for the building of an Electric Power Station. There is an excess of labourers. *Cradock*.—There is an excess of workers in the building, engineering and retail trades. *De Aar*.—Three buildings are in progress, coloured men being employed at from 5s. to 10s. per diem. There is a good demand for native farm hands at 10s. to 15s. per month, with food and shelter. *East London*.—Four plans were approved by the Municipality, the approximate cost of the proposed work being £868. Milling engineers are fairly busy, and there seems to be a slight improvement in the retail trade. There were no convictions for vagrancy. *Fort Beaufort*.—About 30 natives left for work at the mines. *Fraserburg*.—There is a demand for coloured farm hands. *Glen Grey*.—Natives are leaving daily for the Transvaal mines. *Hay*.—Coloured shepherds are required. *Humansdorp*.—There is an excess of labourers. *King William's Town*.—There is a slight excess of building trade artisans and salesmen, but a dearth of agricultural labourers owing to the relatively higher wages offered by labour agents for the mines. *Mafeking*.—There is a demand for natives for the mines. *Malmesbury*.—The surplus of coloured labourers appear to have been absorbed by the Rand Mines. *Mid-delburg*.—There is a slight excess of building trade artisans and labourers. *Molteno*.—There is an excess of artisans and salesmen. *Mossel Bay*.—Work on the new hospital is drawing to a close. The retail trade continues quiet, and there is an excess of labourers. *Namaqualand*.—There is still a scarcity of coloured farm hands. Twenty-one natives were registered for Johannesburg. *Paarl*.—The following are the rates of wages per diem paid to local artisans:—Building trade: Europeans, 6s.; coloured, 3s. 6d.; stonecutters, 10s.; engineers, 9s.;

2 COLONIAL SECRETARY'S MINISTERIAL DIVISION.

factory workers, Europeans, 7s.; coloured 3s. 6d.; coloured farm hands, 9d., with food and wine, or 1s. 9d. with shelter only; general labourers, 3s.; shop assistants, £6 10s. per mensem. *Peddie*.—The natives are leaving in small parties for work at the mines. *Port Elizabeth*.—Very little building is being carried on at present, and there is a plentiful supply of all classes of labour with the exception of certain leading hands in the cabinet and shoemaking trades. The Local Relief Committee are about to hand over their cases of distress to the Benevolent Society, although continuing to assist with collections, etc. About 80 persons are at present in receipt of assistance, the majority being aged females or children. There is a sensible decrease in the number of street corner loungers. *Port Nolloth*.—There is an excess of labourers. *Prince Albert*.—There is a fair demand for agricultural labourers, and domestic servants are scarce. *Queenstown*.—There would appear to be a slight general improvement in all branches of trade, but there is no demand for labour from outside sources. Convictions for vagrancy, 8. *Simon's Town*.—The building trade is very dull, and there is an excess of labourers. *Stellenbosch*.—There is an excess of artisans in the building and engineering trades. *Steynsburg*.—There is an excess of labourers. *Steytlerville*.—There is an excess of artisans and labourers. *Sutherland*.—Coloured farm hands and domestic servants are in demand. *Uniondale*.—Farm hands are required. *Van Rhynsdorp*.—Coloured labourers and shepherds are scarce. *Victoria East*.—There is a considerable excess of building trade artisans and salesmen. *Victoria West*.—The New Public School is now in course of erection, but the supply of artisans is sufficient for any demands likely to arise. *Worcester*.—There is a demand for farm hands.

SUPPLY AND DEMAND.

The remaining districts do not need special comment, as the supply of labour is reported to be equal to the demand. The reports indicate that in the undermentioned centres the supply exceeds the demand:—

Building trades.—Cradock, King William's Town, Middelburg, Port Elizabeth, Stellenbosch, Steytlerville, Victoria East. *Engineering trades*.—Cradock, Stellenbosch. *Retail trade*.—Cape, Cradock, King William's Town, Molteno, Victoria East. *Unskilled labourers*.—Ceres, Cradock, Humansdorp, Middelburg, Mossel Bay, Port Elizabeth, Port Nolloth, Simonstown, Steynsburg, Steytlerville.

The only specific demand is for the services of coloured and native farm hands, shepherds, and labourers at Calvinia, Carnarvon, De Aar, Fraserburg, Hay, King William's Town, Mafeking, Namaqualand, Prince Albert, Stutterheim, Uniondale, Van Rhynsdorp, and Worcester.

[1910.]

Kantoor van den Landmeter-Generaal,
Kaapstad, 13 April, 1910.

OVEREENKOMSTIG Artikel II., Wet No. 15 van 1887, als geamendeerd voor artikels IV., V., en VI. van Wet No. 40 van 1895, wordt hiermede ter algemeene informatie bekend gemaakt dat de volgende Perceelen Kroonland in de Afdeeling Namaqualand bij publieke veiling te koop aangeboden zullen worden voor de kantoren van den Resident Magistraat, Port Nolloth, om 10 uur v.m. op Vrijdag, 8 Juli 1910, onderhevig aan de voorwaarden en bepalingen in bovengemelde wet en in de algemeene koopcondities uiteengezet, en verder aan zulke voorwaarden als op den verkoopdag mogen genoemd worden.

Ieder Lot zal te koop geboden worden tegen den vastgezette inzetprijs, en de hoogste bieder, die niet minder dan dien inzetprijs zal geboden hebben, zal de koper verklaard worden, en zoodanige koper zal de keus hebben of het geheel of een deel van de koopsom op den koopdag te betalen: Met dien verstande:

- (i) Dat, als geene betaling geschiedt op den koopdag een-tiende van den koopprijs betaald worden zal op maanden en een-tiende op twaalf maanden, gerekend van den verkoopdag.
- (ii) Dat, als minder dan een-tiende van den koopsom op den koopdag betaald wordt, het overige van zulk een-tiende betaald worden zal na verloop van zes maanden, en het andere een-tiende na verloop van twaalf maanden gerekend van den verkoopdag.
- (iii) Dat, als, het bedrag betaald op den verkoopdag het een-tiende zijn zal of eenige som tusschen een-tiende en een-vijfde deel van de koopsom, het overige van een-vijfde van de koopsom betaald worden zal na verloop van twaalf maanden, gerekend van den koopdag.
- (iv) In geval de koopsom minder dan vijf-en-twintig ponden zal zijn, zal het geheele bedrag kontant of in drie gelijke jaarlijksche paaiementen betaald worden.

Interest op de bovengenoemde sommen zal betaald worden gerekend tegen vier per cent per jaar; en de betaling der paaiementen, met de interest daarop, zal op den koopdag door twee naar het oordeel van den Resident Magistraat goede, voldoende borgen verzekerd worden welke borgen in betrekking tot die betaling zich als borgen in *solidum* en mede principale schuldenaars verbinden, afstand doende van de excepties van executie en divisie.

Als de koper of diens borgen feilen, of niet in staat zijn de noodige betalingen van de koopsom als bovengenoemde binnen den gestelden tijd te doen, zal de Regeering het recht hebben den koop nietig te verklaren, en alle betalingen reeds gedaan ten opzichte van dien koop, zullen aan de Regeering vervallen.

- (i) That if no payment be made on the day of sale one-tenth of the purchase price shall be paid at six and one-tenth at twelve months from the day of sale.
- (ii) That if less than one-tenth of the purchase price be paid on the day of sale, the balance of such one-tenth shall be paid at the expiration of six months, and the remaining one-tenth at the expiration of twelve months from the day of sale.
- (iii) That if the amount paid on the day of sale be one-tenth or any sum between one-tenth and one-fifth of the purchase price, the balance of one-fifth of the purchase price shall be paid at the expiration of twelve months from the day of sale.
- (iv) In cases where the purchase-money is less than twenty-five pounds, the whole amount shall be paid in cash, or in three equal annual instalments from the day of sale.

Interest on the instalments above mentioned shall be paid at the rate of four per centum per annum; and the payments of the instalments, together with the interest thereon, shall be secured on the day of sale by two good and sufficient sureties to the satisfaction of the Civil Commissioner, which sureties will bind themselves in regard to such payments as sureties *in solidum* and co-principal debtors, renouncing the exceptions of excussion and division.

If the purchaser or his sureties fail, or are unable to make the necessary payments of purchase money as above within the stipulated time, it shall be competent for the Government to cancel the sale, and all payments already made in respect of such sale shall be forfeited to the Government.

The expenses of Survey, etc., on each Lot and of the Title Deed (viz., 12s. 3d.) shall be paid to the Civil Commissioner, or other duly authorised person in that behalf on the day of sale.

The purchaser shall be bound to pass a mortgage bond bearing interest at the rate of four per centum per annum in favour of the Government for four-fifths of the purchase price, unless he shall have paid on the day of sale more than one-fifth thereof, in which case the amount of the bond shall be for the balance of the purchase price, the purchaser having the right to pay off the bond or any portion thereof, not being less than fifty pounds at any time.

If the purchaser be desirous of holding the balance of the purchase money on mortgage as above, he will be required to pass the Bond within thirteen (13) calendar months from the day of sale, failing which, a fine of one shilling will be imposed for every day allowed to pass beyond it, up to eighteen months from the date of sale, after which, should such failure still continue, the balance of the purchase money, with interest thereon, and the amount of the fine, if any, so imposed, shall forthwith become due and payable, and shall be recoverable in any competent court of law without further notice, and if not paid within one month after the date of judgment, the sale shall become null and void, and payments already made in respect thereof shall be forfeited to the Government.

The Diagrams and Conditions of Sale may be seen at the Surveyor-General's Office, Cape Town, and at the Office of the Civil Commissioner, Namaqualand.

No. 165, 1910.

RURAL COUNCIL ELECTIONS.**REGULATIONS FOR THE ELECTION OF MEMBERS OF THE RURAL COUNCIL.**

(Framed under Section 33 of Act No. 33 of 1909.)

1. For the purposes of these Regulations, "polling officer" shall mean the person authorised or appointed to take the poll in elections for the Rural Council by Section 32 of Act No. 33 of 1909.

2. Any polling officer may employ competent persons to assist him in taking the poll; but no person shall be employed as such assistant who has been employed in or about the election by any other person.

3. The Returning Officer shall deliver or cause to be delivered to each polling officer:

- (a) A certified copy of the Voters' List.
- (b) A printed paper containing these Regulations in the English and Dutch languages.
- (c) A ballot box so constructed that the ballot papers can be introduced therein; but cannot be withdrawn without the box being unlocked.
- (d) A sufficient number of ballot papers, each of which papers shall have a number printed on the back, and a counterfoil with a corresponding number on the face; shall contain a list of the candidates, with their descriptions, arranged alphabetically in the order of their surnames, and (if there are two or more candidates of the same surname) of their other names; and shall be in the form in the Schedule hereto.
- (e) A sufficient number of papers in the same form, but of a different colour, to be called "tendered ballot papers."
- (f) A sufficient number of printed copies in the English and Dutch languages of the directions for filling up ballot papers as set forth in the Schedule hereto.
- (g) Instructions and implements for placing the official mark on ballot papers.
- (h) Such other printed notices and stationery as may be necessary for the proper conduct of the election.

4. The official mark shall be decided on by the Returning Officer, and shall be communicated by him to the polling officers and to no other person; and an interval

of not less than seven years shall intervene between the use of the same official mark at elections for the same district.

5. The polling places for each of the districts shall be those determined by the Returning Officer in terms of Section 32 of Act 33 of 1909.

6. Each polling place shall be provided with compartments for voting, in which the voters can mark their votes screened from observation. The number of compartments at each station shall be such as the Returning Officer may think necessary.

7. These compartments shall be so arranged that no person can enter or quit any such compartment without being seen by the polling officer.

8. In each compartment for voting there shall be posted up a printed copy, in the English and Dutch languages, of the directions for filling up ballot papers; but no other notice shall be posted in such compartments.

9. Each compartment shall be furnished with a table or desk, and one or more black lead pencils properly pointed, and no other furniture, paper or thing, excepting the directions referred to in paragraph 8, shall be contained in such compartment.

10. During the hours of polling no person shall enter any compartment for voting except voters desirous of marking their papers. Provided, however, that the polling officer or his assistant may from time to time enter any such compartment, when not occupied by a voter, for the purpose of seeing that such compartment is in order in accordance with Regulations 8 and 9.

11. On the day appointed for the polling the polling officer at each polling station, just before the commencement of the poll, shall show the ballot box empty to such persons, if any, as may be present at such station, so that they may see that it is empty, and shall lock it up, and place his seal upon it in such manner as to prevent its being opened without breaking such seal, and shall place it in his view for the receipt of ballot papers, and keep it so locked and sealed.

12. The polling officer shall keep order at his polling station, shall regulate the number of voters to be admitted at a time, and shall exclude all other persons except his assistants, the candidates, agents of candidates duly appointed in accordance with Section 35 of Act 33 of 1909, and constables on duty.

13. Every officer, clerk, candidate or agent in attendance at a polling station shall maintain, and aid in maintaining, the secrecy of the voting in such station, and shall not communicate, except for some purpose authorised by law, before the poll is closed, to any person any information as to the name or number on the voters' list, of any voter who has or has not appeared for a ballot paper, or voted at such station, or as to the official mark; and no such officer, clerk, candidate, agent, and no person whosever, shall interfere with or attempt to interfere with, a voter when marking his vote, or otherwise attempt to obtain in the polling station information as to the candidate for whom any voter at such station is about to vote or has voted, or communicate at any time to any person any information obtained in a polling station as to the candidate for whom any voter in such station is about to vote or has voted, or as to the number on the back of the ballot paper given to any voter at such station.

No person shall directly or indirectly induce any voter to display his ballot paper after he shall have marked the same, so as to make known the candidate for whom he has marked his vote.

14. If any person misconducts himself in any polling station, or fails to obey the lawful orders of the polling officer, he may immediately, by order of the polling officer, be removed from the polling station by any constable or other person authorised by the polling officer to remove him; and the person so removed shall not, unless with the permission of the polling officer, again be allowed to enter the polling station during that day.

Any person so removed as aforesaid if charged with the commission in such station of any offence may be kept in custody until he can be brought before the Resident Magistrate of the district.

Provided that the powers conferred by this Regulation shall not be exercised so as to prevent any voter otherwise qualified to vote at such station from recording his vote at such station.

15. When any person comes to vote the polling officer shall ascertain if he is a person qualified to vote at that polling station; and the provisions of Sections 36 and 37 of Act 33 of 1909 shall apply to such enquiry.

2. COLONIAL SECRETARY'S MINISTERIAL DIVISION.

16. If the polling officer is satisfied that the person presenting himself is entitled to vote he shall within the polling station deliver to such person a ballot paper, having first placed his official mark on both sides of the paper, and the polling officer shall at the same time mark upon the counterfoil of such paper the number opposite to the voter's name on the list of voters, and a mark shall be placed against the voter's name on the list of voters to show that he has received a ballot paper, but without showing the particular ballot paper he has received.

17. On receiving the ballot paper the voter shall forthwith proceed into the compartment allotted to him by the polling officer, and there mark his paper according to the directions in the Schedule hereto.

18. The voter shall then fold his paper so as to conceal his vote, and shall place the paper in the ballot box in the presence of the polling officer after having shown him the official mark on the back.

19. Each voter shall vote without undue delay, and shall quit the polling station as soon as he has placed his paper in the ballot box.

20. A voter who has inadvertently dealt with his ballot paper in such a manner that it cannot be conveniently used as a ballot paper may, on delivering to the polling officer the ballot paper so inadvertently dealt with, and proving the fact of the inadvertence to the satisfaction of the polling officer, obtain another ballot paper in the place of the ballot paper so delivered up (in these Regulations called a spoilt ballot paper), and the spoilt ballot paper shall be immediately cancelled, and the fact of such cancellation shall be noted upon the counterfoil.

21. A voter having received a ballot paper from the polling officer shall not be permitted to quit the polling station or pass out of the view of the polling officer, except to enter the compartment for voting allotted to him by the polling officer for the purpose of marking his paper, until he has placed his paper in the ballot box or returned it to the polling officer as a spoilt ballot paper in accordance with Regulation 20.

22. The polling officer, on the application of any voter who is incapacitated by blindness or other physical cause from voting in manner prescribed by these Regulations, or of any voter who makes such a declaration as herein-after mentioned that he is unable to read, shall in the presence of the agents of the candidates, cause the vote of such voter to be marked on a ballot paper in manner directed by such voter, and the ballot paper to be placed in the ballot box; and the name and number on the list of voters of every voter whose vote is marked in pursuance of this Regulation and the reason why it is so marked shall be entered on a list, in these Regulations called "the list of votes marked by the polling officer." The said declaration, in these Regulations referred to as "the declaration of inability to read," shall be made by the voter at the time of polling, before the polling officer, who shall attest it in the form hereafter set forth in the Schedule hereto, and no fee, stamp or other payment shall be charged in respect of such declaration, and the said declaration shall be given to the polling officer at the time of voting.

23. If at the time any person tenders his vote, or after he has voted, and before he leaves the polling station, any candidate or duly appointed agent shall declare to the polling officer that he verily believes, and undertakes to prove, that the person so voting is not in fact the person in whose name he assumes to vote, the polling officer shall not refuse to receive the vote of such person, but shall note on the counterfoil of the ballot paper given to such person and also against his name in the voters' list the words "protested against for personation."

24. If a person representing himself to be a particular voter named on the list applies for a ballot paper after another person has voted as such voter, the applicant shall, upon duly answering the questions permitted to be put to a voter by Section 36 of Act 33 of 1909, be permitted to mark a ballot paper (or have a ballot paper marked for him in accordance with Regulation 22) in the same manner as any other voter; but the ballot paper (in these Regulations called a "tendered ballot paper") shall be of a colour differing from the other ballot papers, and, instead of being put into the ballot box, shall be given to the polling officer and endorsed by him with the name of the voter and his number in the list of voters and set aside in a separate packet. And the name of the voter and his number on the voters' list shall be entered on a list, in these Regulations called "the tendered votes

25. The polling officer shall as soon as practicable after the closing of the poll, make up into separate packets:—

- (1) The ballot box in use at his station unopened.
- (2) The unused and spoilt ballot papers placed together.
- (3) The tendered ballot papers.
- (4) The marked copies of the list of voters and the counterfoils of the ballot papers.
- (5) The "tendered votes list."
- (6) The list of votes marked by the polling officer and a statement of the numbers of the voters whose votes are so marked by the polling officer under the heads of "physical incapacity" and "unable to read," and the declarations of inability to read;

and the polling officer shall deliver, or cause to be delivered, such packets to the Returning Officer. Any candidate or duly appointed agent, present at the close of the poll, may, if he desire it, seal each of such packets.

26. The packets shall be accompanied by a statement made by such polling officer, showing the number of ballot papers entrusted to him, and accounting for them under the heads of (1) ballot papers in ballot box, (2) unused, (3) spoilt, and (4) tendered ballot papers, which statement is in these Regulations referred to as "the ballot paper account."

27. As soon as practicable after receiving the ballot boxes the Returning Officer shall fix a time for counting the votes, and shall give notice of such time to the candidates or their agents, and each candidate may attend such counting personally or appoint in writing one agent to represent him.

28. The Returning Officer may appoint competent persons to assist him in counting the votes, but no person shall be appointed as such assistant who has been employed in or about the election by any other person.

29. The Returning Officer, his assistants, the candidates or their agents, and no other person may be present at the counting of the votes.

30. The votes for each district shall be counted separately at different times, and during the counting of the votes for each district the candidates for such district only and their agents shall be entitled to be present, and not the candidates for other districts or their agents.

31. The Returning Officer shall unlock the ballot boxes and break the seals thereof in the presence of such candidates or agents as may be entitled to and may be present at the counting; and in case there shall be more than one polling station for any district, the Returning Officer shall, before proceeding to count the votes, count and record the number of such papers in each box separately, and then mix together the contents of all the ballot boxes returned from polling stations for that district. The Returning Officer, while counting and recording the number of ballot papers and counting the votes, shall keep the ballot papers with their faces upward, and take all proper precautions for preventing any person from seeing the numbers printed on the backs of such papers.

32. The Returning Officer shall, so far as practicable, proceed continuously with counting the votes, allowing only time for refreshments, and excluding (except so far as he and the candidates or their agents otherwise agree) the hours between seven o'clock at night and nine o'clock on the succeeding morning. During the excluded time the Returning Officer shall place the ballot papers and other documents relating to the election under his own seal and the seals of such candidates or agents as desire to affix their seals, and shall otherwise take proper precautions for the security of such papers and documents.

33. The following reasons shall justify the Returning Officer in rejecting any ballot paper, and he shall reject such paper accordingly:—

- (1) Want of official mark.
- (2) Giving more votes than entitled to.
- (3) Writing or mark by which voter could be identified.
- (4) Unmarked, or void for uncertainty.

The Returning Officer shall endorse "rejected" on any ballot paper which he may reject as invalid, and shall add to the endorsement, "rejection objected to" if an objection be in fact made to his decision by any candidate or agent, and the Returning Officer shall, on completion of the counting, seal up in separate packets the accepted and rejected papers.

2. COLONIAL SECRETARY'S MINISTERIAL DIVISION.

34. Upon the completion of the counting, the Returning Officer shall proceed in the presence of the candidates and agents to verify the ballot paper account given by each polling officer by comparing it with the number of ballot papers recorded by him and the unused and spoilt ballot papers in his possession and the tendered votes list, and shall reseal each packet after examination.

The sealed packet of tendered ballot papers and the marked copy of the list of voters and counterfoils shall not be opened except by order of a Judge of the Supreme Court.

35. The Returning Officer shall, as soon as convenient after the completion of the counting, publicly announce the state of the poll, and at the same time declare the names of the Councillors elected. And in the event of the number of votes being found to be equal for any two or more candidates, he shall by lot determine which shall be elected. He shall thereafter cause the names of the Councillors who shall have been elected to be published in the *Government Gazette* in accordance with the provisions of Section 38 of Act No. 33 of 1909.

36. All documents relating to an election shall be retained by the Returning Officer for one year, and shall then be destroyed, unless otherwise ordered by a Judge of the Supreme Court.

37. No persons shall be allowed to inspect the counterfoils of ballot papers, the tendered ballot papers, the rejected ballot papers, the marked copies of voters' lists, or the tendered votes list, except by order of a Judge of the Supreme Court; such order may be made subject to such conditions as to persons, time, place and mode of opening or inspection as the Judge making the order may deem expedient: Provided that on making and carrying into effect any such order, care shall be taken that the mode in which any particular voter has voted shall not be discovered until he has been proved to have voted and his vote declared by a competent Court to be invalid.

38. It shall be competent for any voter, registered or alleging himself to be registered as such in any district, who shall complain that his vote, duly tendered at the poll taken in such district, was rejected by the polling officer, or shall complain that at such poll a person not registered as a voter in such district was admitted to vote, or who shall complain of any other irregularity fallen into at such poll, and any candidate who shall complain of any decision of the Returning Officer in counting the votes, or of any irregularity fallen into at such counting, to petition the Supreme Court, that the grounds of such complaint may be investigated: Provided that such petition shall be lodged with the Court not later than forty-two days after the date of such alleged irregularity; and provided further that notice of such petition be given to the Returning Officer, polling officer, or other person, complained against in such petition.

39. At the hearing of such petition the Court shall have power to take evidence by witnesses or by affidavit, and may order any vote which has been rejected to be recorded or any vote which has been recorded to be rejected or may make such other order as may seem fit; and for the purpose of recording or rejecting any vote the Court may order an inspection of any documents used at the election, subject to the conditions laid down in Regulation 37; and the Court may make such order as to costs as may seem fit.

40. If, after such inspection as in the preceding section mentioned, it shall happen that the position of the candidates on the poll is altered, notice shall be published in the *Gazette* annulling the notice published under Regulation 35 and Section 38 of Act 33 of 1909, and declaring those candidates to be elected who shall be found, after such inspection, to have most votes.

41. No person who has voted at an election shall in any legal proceeding to question the election or return be required to state for whom he has voted.

42. No election shall be declared invalid by reason of any mistake in the use of the forms in the Schedule to these Regulations if it appears to the Court, having cognisance of the question, that the election was conducted in accordance with the principles laid down in these Regulations, and that such non-compliance or mistake did not affect the result of the election.

43. A person applying for a ballot paper under these Regulations shall for the purpose of any law relating to elections or voting at elections be deemed "to tender his vote," or "to assume to vote" or "to attempt to vote."

44. A person shall be deemed to be guilty of an offence of personation who at an election applies for a ballot paper in the name of some other person, whether that name be that of a person living or dead, or of a fictitious person, or who having voted once at any election applies at the same election for a ballot paper in his own name.

45. When on the trial of an election petition, praying the Court to determine that some other person than the respondent is entitled to be declared duly elected under the provisions of these Regulations and Act 33 of 1909, in place of the respondent, it is proved that any person who voted at such election was bribed, or treated, or subjected to undue influence by any one on behalf of the respondent, or that such person was guilty of personation, there shall be struck off from the number of votes appearing to have been given to such respondent the number of votes which were given at the election for the respondent candidate by any such person who voted at such election, and shall be proved to have been bribed, treated or unduly influenced or to have been guilty of personation as aforesaid.

46. No written authority given in terms of any of these Regulations shall require to be stamped as a power of attorney.

47. Anything that is by these Regulations authorised to be done by any polling officer in taking the poll, or by the Returning Officer in counting the votes, may be lawfully done by any assistant to such polling officer or Returning Officer.

* As per G.46—1909, Second Print. These figures allow for amounts to be derived from Additional Taxation, &c., but were not available when the Statements for September and October were prepared.

(a) Net Revenue after deducting amounts due to "Other Administrations" for Customs Union Duties.

(b) The decrease is due to Sinking Fund Receipts being carried to Revenue in 1908-09 in terms of Act 13 of 1908.

(c) The increase is no doubt largely due to the improvement in trade.

(d) Includes £3,217 under the Cigarette Tax Act, No. 12 of 1909.

(e) The increase is due to the earlier transfer to Revenue of amounts from Loans Acts Accounts and to increased temporary investments in London.

(f) The decrease is mainly due to abnormal sales of guano in March, 1909. The receipts include £2,888 derived from the sale of sleepers.

(g) The decrease is due to the transfer of the Table Bay, Port Elizabeth and East London Harbours to Government, no further payments being made to Revenue in re-imbursement of the Public Debt charges previously recouped by the Harbour Boards. The receipts include £6,697 derived from Temporary Deductions from Salaries.

(h) The receipts are made up as follows:—Traffic Receipts, £291,704; Temporary Deductions from Salaries, £5,788; Refreshment Branch Receipts, £8,374, and Forest Plantation Revenue, £11. The net increase of £43,909 is made up as follows:—Traffic Receipts, £42,404; Refreshment Branch Receipts, £985; Temporary Deductions from Salaries, £512; and Forest Plantation Receipts, £8. The above figures allow for approximate amounts due to "Other Administrations" and include £28,818 paid by "Foreign Administrations" on account of January and February, 1910, traffic, but are exclusive of £5,875 outstanding on account of February, 1910, traffic, and of about £26,000 on account of March, 1910, traffic.

MERCHANT SHIPPING LIFE-SAVING APPLIANCES.

THE following Notice issued by the Board of Trade together with an extract from a report of the Merchant Shipping Advisory Committee respecting line-throwing appliances for use on ships in cases of shipwreck or distress at sea is published for general information.

J. W. SAUER,
Commissioner of Public Works.

NOTICE TO SHIPOWNERS, MASTERS AND OFFICERS.

LINE-THROWING APPLIANCES.

The following brief summary of the Report of the Merchant Shipping Advisory Committee, which recently enquired into the question of line-throwing appliances for establishing communication from a ship to the shore or from ship to ship, is issued for the information of shipowners, masters, and officers. The full report has been published as a Parliamentary paper (Cd.4552), and may be obtained, either directly or through any bookseller, from Messrs. Wyman & Sons, Fetter Lane, London, E.C.; Messrs. Oliver & Boyd, Tweeddale Court, Edinburgh; and Mr. E. Pousonby, 116, Grafton Street, Dublin, price 4d.

The Report shows that an efficient line-throwing appliance, which may be of service in saving life, can be obtained at a comparatively small cost; and while the Board of Trade have no compulsory powers in the matter, they commend the recommendations of the Committee to the attention of those concerned.

It is important that any such appliance should be exercised from time to time, so that those on board may know how to work it.

SUMMARY OF REPORT.

1. The line-throwing appliances examined and tested by the Committee consisted of guns, rockets, kites, buoys, etc., and the Committee came to the conclusion that it would be practically impossible for any one appliance to be equally suitable and effective under all conditions, but that any appliance to be carried on board ship should be able to meet the needs of most of the conditions likely to arise in practice. Further, that such an appliance should be inexpensive, simple in construction, and easily manipulated and used.

2. Having regard to these requirements, the Committee expressed the opinion that the most suitable kind of line-throwing appliance for general use would be found in some form of rocket apparatus; but they add that, in addition to the line-throwing appliance, provision should be made for sending ashore a strong rope with a properly secured breeches buoy attached, and

5. MINISTERIAL DIVISION OF COMMISSIONER OF PUBLIC WORKS.

that the whole apparatus should be kept ready for use in some easily accessible part of the ship.

3. In the case of small vessels, the Committee suggest that communication could in many cases be effected at a distance of 200 yards by means of a 2 lb. or 4 lb. rocket, with 500 yards of strong line about the size of an ordinary cod or mackerel line. A stronger line could then be made fast to the end of this line, and an ordinary life-buoy or a life-buoy fitted with breeches could be fastened on the bight of this stronger line.

EXTRACT FROM REPORT OF THE MERCHANT SHIPPING ADVISORY COMMITTEE TO THE BOARD OF TRADE RESPECTING LINE-THROWING APPLIANCES FOR USE ON SHIPS IN CASES OF SHIPWRECK OR DISTRESS AT SEA.

Although we do not consider that it is either desirable or necessary that we should select any one particular appliance as, in our opinion, best satisfying these conditions, yet we venture to offer the following remarks on the general question of the efficiency of the various classes of appliances.

It is evident that such appliances as kites, balloons, and buoys must be somewhat uncertain in their action, for they depend either on the wind, or the tides, or currents, for their power of propulsion; and, having regard to the comparatively small variety of circumstances in which they would be effective, we think that appliances of this nature could only be regarded as an adjunct to some other line-throwing apparatus.

To differentiate between the two remaining classes of appliances—guns and rockets—is somewhat difficult. There is much to be said in favour of both, and it is possible that a suitable appliance for the object in view could be found in either class. As a rule the aim of a gun is better than that of a rocket, and its projectile is not as liable as a rocket to be deflected by the action of the wind. On the other hand a gun is more expensive than a rocket, is not so easily manipulated, and, unless in the form of a shoulder gun, cannot be transported from one part of a ship to another with the same facility. In the case of a shoulder gun the range must necessarily be somewhat limited. Further, as the projectile starts from a gun with its maximum velocity, there is greater liability to the line breaking them in the case of a rocket which gradually increases its velocity during its flight.

It is probable that a greater range can be more easily obtained with a gun than with a rocket, but having regard to the fact that it is hardly possible to save life at a greater distance than 300 yards, this advantage is of comparatively small account. Moreover, as the flight of a rocket is visible to those on shore, there is less danger in firing a rocket towards them than in firing a projectile from a gun.

Therefore, taking these facts into consideration, and bearing in mind the conditions to be met, we cannot but think that the most suitable kind of appliance for general use will be found in some form of rocket apparatus. In expressing this opinion, however, we do not wish to exclude shoulder or other guns from future consideration, or to suggest that they might not usefully be adopted on the larger type of vessels, or in connection with salvage work.

With regard to the exact form of rocket appliance we consider it undesirable to lay down any precise rule, but we venture to call attention to the portable forms of rocket apparatus which have been submitted to us, as indicating the type of appliance that would be likely to be of most service for general use. It is worthy of note that one important line of Liverpool steamers is already equipped with a portable rocket apparatus. We recognise that when communication has been effected with the shore the work of rescue has only been begun; and, therefore, in addition to the line-throwing appliance, provision should be made for sending ashore a strong rope with a properly secured breeches buoy attached, and the whole apparatus should be kept ready for use in some easily accessible part of the ship.

In the case of small vessels that would be likely to get close in shore, it would only be necessary to have a 2 lb. or a 4 lb. rocket with 500 yards of strong line about the size of an ordinary cod or mackerel line. With this equipment communication could be made in most cases at 200 yards, and then an ordinary life-buoy or a life-buoy fitted with breeches could be fastened on the bight of a stronger line.

Before, however, any kind of appliance is supplied to ships, it should be approved by the Board of Trade, and

whatever the form of appliance to be carried, we consider that it is essential that, wherever practicable, the Surveyors of the Board of Trade should see that the use of the appliance is thoroughly understood by some of the officers and crew.
